PATENT

REMARKS/ARGUMENTS

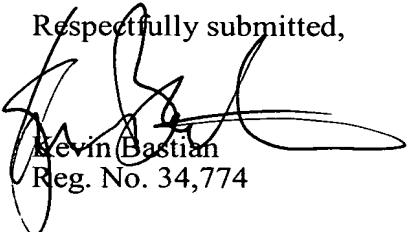

The Substitute Specification merely includes typographical or clerical changes and does not include new matter. In particular, the amendment to the title is made to more clearly reflect the subject matter of the instant application. Amendments to paragraphs [0010] through [0019] and paragraphs [0050] through [0065] add periods (".") to the end of each sentence. Section headings were added throughout the application and the formatting for heading already included in the specification was changed. The amendments to paragraphs [0092] and [0097] were made to more clearly describe the subject of the sentence. The amendments to paragraphs [0134] and [0139] are made to correct errors in the Japanese specification. No new matter is added.

A Sequence Listing on paper and in computer readable form was prepared in accordance with 37 C.F.R. §§1.821 to 1.825, and is submitted herewith. The Sequence Listing does not include new matter or matter that goes beyond the disclosure of the International Application.

The information contained in the computer readable disk was prepared through the use of the software program "FastSeq" and is identical to that of the paper copy of the Sequence Listing.
